INDEX TO VOLUME XIII.

SUBJECTS.

PAGE

ABSORPTION, Atmospheric, of the Visible Rays. *A. Cornu* - - 142

ALGOL Variables, *RR Puppis* and *V Puppis*, Orbits of. *Alexander W. Roberts* - - - - - - - - - - - - 177

ANDERSON'S New Star in *Perseus*. *Edward C. Pickering* - - 170

ANOMALOUS Dispersion, Production of a Line Spectrum by. *R. W. Wood* - - - - - - - - - - - - 63

ARC-SPECTRUM of Iron, Standard Lines in. *H. Kayser* - - - 329

Arcturus, Heat Radiation of. *E. F. Nichols* - - - - - 101

ATMOSPHERIC Absorption of the Visible Rays, Determined from Spectroscopic Observations of the Eiffel Tower Electric Lights in 1889. *A. Cornu* - - - - - - - - - - 142

BINARY, Spectroscopic, *Mizar*. *H. C. Vogel* - - - - - 324

BLACK Body, Radiation of. *C. E. Mendenhall* and *F. A. Saunders* - 25

BODY, Radiation of a Black. *C. E. Mendenhall* and *F. A. Saunders* - 25

CORONA, Nature of Solar. *R. W. Wood* - - - - - - - 68

CORONAL Lines, Ultra-Violet. *K. D. Naegamvala* - - - - 240

CROSSLEY Reflector, Examination of *Pleiades* and *Eros* Plates taken with. *J. K. Rees* - - - - - - - - - - 48

DENSITY of the Solar Nebula. *Anne Sewell Young* - - - 338

DIFFRACTION by Light of Variable Intensity. *H. M. Reese* - - 199

DISPERSION, Graphical Study of Refraction and. *A. de Gramont* - 208

DISPERSION, Production of Line Spectrum by Anomalous. *R. W. Wood* - - - - - - - - - - - - 63

DOPPLER'S Principle. *W. Michelson* - - - - - - - 192

DOPPLER-FIZEAU Principle, Laboratory Demonstration of. *A. Bélopolsky* - - - - - - - - - - - - 15

ECLIPSE, Solar, May 28, 1900. *H. C. Lord* - - - - - - 149

January 22, 1898, Wave-Length Determinations and General Results. *J. Evershed* - - - - - - - - - - 223

EIFFEL Tower, Atmospheric Absorption of Electric Lights on. *A. Cornu* - - - - - - - - - - - - - 142

Eros and *Pleiades* Plates, Examination of. *J. K. Rees* - - - 48

Variability in Light of. *Edward C. Pickering* - - - - 273

Variation in Light of. *Edward C. Pickering* - - - - 277

PAGE

FLASH Spectrum, Application of Anomalous Dispersion to. *R. W. Wood* - - - - - - - - - - - - - 63

ζ Geminorum, Motion of, in Line of Sight. *W. W. Campbell* - - 90

GRAPHICAL Study of Refraction and Dispersion. *A. de Gramont* - 208

HEAT Radiation of *Arcturus*, *Vega*, *Jupiter*, and *Saturn*. *E. F. Nichols* - - - - - - - - - - - - 101

INTERFEROMETER, On a New Form of. *Ch. Fabry* and *A. Perot* - 265

IRON, Standard Lines in the Arc Spectrum of. *H. Kayser* - - 329

Jupiter, Heat Radiation of. *E. F. Nichols* - - - - - - 101

LICK OBSERVATORY, *Pleiades* and *Eros* Plates taken with the Crossley Reflector of. *J. K. Rees* - - - - - - - - - 48

LIGHT of Variable Intensity, Diffraction of. *H. M. Reese* - - 199

LINE of Sight, Motion of *ζ Geminorum* in. *W. W. Campbell* - - 90

Motion of *α Persei* in. *H. C. Vogel* - - - - - - - 320

Mizar, The Spectroscopic Binary. *H. C. Vogel* - - - - - 324

MOTION of Solar System, Preliminary Determination of. *W. W. Campbell* - - - - - - - - - - - - 80

NEBULA, Density of Solar. ***Anne Sewell Young*** - - - - - **338**

Nova Persei*, Spectrum of.** ***H. C. Vogel - - - - - - **217**

No. 2. ***Edward C. Pickering*** - - - - - - - - **232**

Second Chart and Catalogue for Observing. ***John G. Hagen*** - **233**

Changes in Spectrum of. ***George E. Hale*** - - - - **238**

William H. Pickering - - - **277**

February 28 to April 4. ***Walter Sidgreaves*** - - - - **278**

Brightness of. ***George C. Comstock*** **and** ***Joel Stebbins*** - - **336**

PERIOD of the Solar Spots. ***Simon Newcomb*** - - - - - - 1

α Persei*, Motion of, in the Line of Sight.** ***H. C. Vogel - - - **320**

Persei, Nova*. Spectrum of.** ***H. C. Vogel - - - - - - **217**

No. 2. ***Edward C. Pickering*** - - - - - - - - **232**

Second Chart and Catalogue for Observing. ***John G. Hagen*** - **233**

Changes in the Spectrum of. ***George E. Hale*** - - - - **238**

William H. Pickering - - **277**

February 28 to April 4. ***Walter Sidgreaves*** - - - - **278**

Brightness of. ***George C. Comstock*** **and** ***Joel Stebbins*** - - **336**

Perseus*, Anderson's New Star in.** ***Edward C. Pickering - - - **170**

New Star in. ***George E. Hale*** - - - - - - - - **173**

PHOTOMETER, Determination of Wedge Constant of Stellar. ***J. A. Parkhurst*** - - - - - - - - - - - - **249**

Pleiades and *Eros* Plates, Examination of. *J. K. Rees* - - - 48

RR Puppis and *V Puppis*, Orbits of the *Algol* Variables. *Alexander W. Roberts* - - - - - - - - - - - - 177

PAGE

V Puppis and *RR Puppis*, Orbits of the *Algol* Variables. *Alexander W. Roberts* - - - - - - - - - - - - 177
ζ Puppis, Spectrum of. *Edward C. Pickering* - - - - - - 230
RADIAL Velocities, Some Stars with Large. *W. W. Campbell* - 98
RADIATION of a Black Body. *C. E. Mendenhall* and *F. A. Saunders* 25
RADIATION, Heat, of *Arcturus*, *Vega*, *Jupiter*, and *Saturn*. *E. F. Nichols* - - - - - - - - - - - - - 101
REFRACTION and Dispersion, Graphical Study of. *A. de Gramont* - 208
REVIEWS. See Table of Contents - - - - - - - - -
ROWLAND, Henry Augustus. *Joseph S. Ames* - - - - - - 241
Saturn, Heat Radiation of. *E. F. Nichols* - - - - - - 101
SOLAR Corona, Nature of. *R. W. Wood* - - - - - - - 68
SOLAR Eclipse of May 28, 1900, Observations of. *H. C. Lord* - 149
Of January 22, 1898, Wave-length Determinations and General Results. *J. Evershed* - - - - - - - - - - 223
Nebula, Density of. *Anne Sewell Young* - - - - - - 338
Spots. Period of. *Simon Newcomb* - - - - - - - - 1
System, Preliminary Determination of Motion of. *W. W. Campbell* - - - - - - - - - - - - - 80
SPECTROSCOPIC Binary *Mizar*. *H. C. Vogel* - - - - - - 324
SPECTRUM, Flash, Application of Anomalous Dispersion to. *R. W. Wood* - - - - - - - - - - - - - 63
of Iron, Standard Lines in Arc. *H. Kayser* - - - - 329
of *Nova Persei*. *H. C. Vogel* - - - - - - - - 217
of *Nova Persei*, Changes in. *George E. Hale* - - - - 238
of *ζ Puppis*. *Edward C. Pickering* - - - - - 230
SPOTS, Period of Solar. *Simon Newcomb* - - - - - - 1
STANDARD Lines in the Arc Spectrum of Iron. *H. Kayser* - - 329
STAR in *Perseus*, Anderson's New. *Edward C. Pickering* - - 170
New. *George E. Hale* - - - - - - - 173
H. C. Vogel - - - - - - - 217
Edward C. Pickering - - - - 232
George E. Hale - - - - - 238
William H. Pickering - - - - 277
February 28 to April 4. *Walter Sidgreaves* - - - - 278
Brightness of. *George C. Comstock* and *Joel Stebbins* - - 336
STARS with Large Radial Velocities. *W. W. Campbell* - - - 98
Variable, Coöperation in Observing. *Edward C. Pickering* - 167
Sixty-four New. *Edward C. Pickering* - - - 226
SUN-SPOT Disturbances, Types of. *A. L. Cortie* - - - - 260
TYPES of Sun-spot Disturbances. *A. L. Cortie* - - - - 260
ULTRA-VIOLET Coronal Lines. *K. D. Naegamvala* - - - 240

PAGE

VARIABLE Intensity, Diffraction by Light of. *H. M. Reese* - - 199
Stars, Coöperation in Observing. *Edward C. Pickering* - - 167
Sixty-four New. *Edward C. Pickering* - - - - 226
VARIABLES, *RR Puppis* and *V Puppis*, on the Orbits of. *Alexander W. Roberts* - - - - - - - - - - - 177
VEGA, Heat Radiation of. *E. F. Nichols* - - - - - 101
VELOCITIES, Radial, Some Stars with Large. *W. W. Campbell* - 98
WAVE-LENGTH Determinations and General Results of the Solar Eclipse of January 22, 1898. *J. Evershed* - - - - 223
WEDGE Constant of Stellar Photometer, Determination of. *J. A. Parkhurst* - - - - - - - - - - - - 249
YERKES OBSERVATORY, *Bulletin No. 16. George E. Hale* - - 173
Bulletin No. 17. George E. Hale - - 238
ZEEMAN Effect, Notes on. *N. A. Kent* - - - - - - 289

For titles of Reviews see Table of Contents.

INDEX TO VOLUME XIII.

AUTHORS.

PAGE

AMES, JOSEPH S. Henry Augustus Rowland - - - - - - 241

AUGUR, A. W. Review of: *Ueber die Ursache der Nordlichter*, Svante Arrhenius - - - - - - - - - - - 344

BÉLOPOLSKY, A. On an Apparatus for the Laboratory Demonstration of the Doppler-Fizeau Principle - - - - - - - 15

CAMPBELL, W. W. A Preliminary Determination of the Motion of the Solar System - - - - - - - - - - - 80

The Motion of ξ *Geminorum* in the Line of Sight - - - - 90

Some Stars with Large Radial Velocities - - - - - - 98

COMSTOCK, GEORGE C., and JOEL STEBBINS. Observations of the Brightness of *Nova Persei* - - - - - - - - - 336

CORNU, A. The Atmospheric Absorption of the Visible Rays, Determined from Spectroscopic Observations of the Eiffel Tower Electric Lights in 1889 - - - - - - - - - - 142

CORTIE, A. L. On the Types of Sun-spot Disturbances - - - 260

EVERSHED, J. Wave-length Determinations and General Results Obtained from a Detailed Examination of Spectra Photographed at the Solar Eclipse of January 22, 1898 - - - 223

FABRY, CH., and A. PEROT. On a New Form of Interferometer - 265

GRAMONT, A. DE. A Graphical Study of Refraction and Dispersion 208

HAGEN, JOHN G. Second Chart and Catalogue for Observing *Nova Persei* - - - - - - - - - - - - - 233

HALE, GEORGE E. New Star in *Perseus* - - - - - - 173

Changes in the Spectrum of *Nova Persei* - - - - - 238

Review of: *Annals of the Astrophysical Observatory of the Smithsonian Institution*, Vol. I. S. P. Langley - - - - 280

KAYSER, H. Standard Lines in the Arc Spectrum of Iron - - 329

KENT, N. A. Notes on the Zeeman Effect - - - - - - 289

LORD, H. C. Observations of the Solar Eclipse of May 28, 1900 - 149

MENDENHALL, C. E., and F. A. SAUNDERS. The Radiation of a Black Body - - - - - - - - - - - - 25

MICHELSON, W. On Doppler's Principle - - - - - - 192

NAEGAMVALA, K. D. Ultra-Violet Coronal Lines - - - - 240

NEWCOMB, SIMON. On the Period of the Solar Spots - - - 1

PAGE

NICHOLS, E. F. On the Heat Radiation of *Arcturus, Vega, Jupiter,* and *Saturn* - - - - - - - - - - - - 101
PARKHURST, J. A. Determination of the Wedge Constant of a Stellar Photometer - - - - - - - - - - - - 249
PEROT, A., and CH. FABRY. On a New Form of Interferometer - 265
PICKERING, EDWARD C. Coöperation in Observing Variable Stars - 167
Sixty-four New Variable Stars - - - - - - - - 226
The Spectrum of *ζ Puppis* - - - - - - - - 230
Variability in Light of *Eros* - - - - - - - - 273
Variation in Light of *Eros* - - - - - - - - 277
Anderson's New Star in *Perseus* - - - - - - - - 170
PICKERING, WILLIAM H. *Nova Persei* - - - - - - - - 277
REES, J. K. Examination of *Pleiades* and *Eros* Plates Taken with the Crossley Reflector of the Lick Observatory - - - - 48
REESE, H. M. Diffraction by Light of Variable Intensity - - 199
ROBERTS, ALEXANDER W. On the Orbits ot the *Algol* Variables *RR Puppis* and *V Puppis* - - - - - - - - - 177
SAUNDERS, F. A., and C. E. MENDENHALL. The Radiation of a Black Body - - - - - - - - - - - - - 25
SIDGREAVES, WALTER. *Nova Persei.* February 28 to April 4: Stonyhurst College Observatory - - - - - - - - - 278
STEBBINS, JOEL, and GEORGE C. COMSTOCK. Observations of the Brightness of *Nova Persei* - - - - - - - - 336
VOGEL, H. C. On the Spectrum of *Nova Persei* - - - - - 217
On the Motion of *α Persei* in the Line of Sight - - - - - 320
The Spectroscopic Binary *Mizar* - - - - - - - - 324
WOOD, R. W. On the Production of a Line Spectrum by Anomalous Dispersion, and its Application to the "Flash Spectrum" - 63
YOUNG, ANNE SEWELL. On the Density of the Solar Nebula - - 338
